

King Acrylic Covering Lacquer

King Acrylic Clear Lacquer

King Cleaning Solution

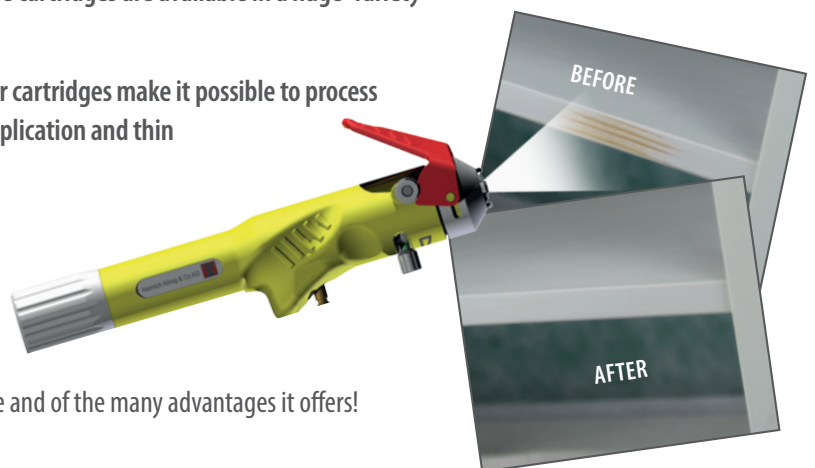

NEW SPRAY TECHNOLOGY WITH THE LACQUER CARTRIDGE

An innovation providing great possibilities

In cooperation with the company Krautzberger, Heinrich König developed a top functional spray device operating with a reclosable lacquer cartridge. This system makes it possible to coat perfectly small surfaces with a minimum amount of lacquer and thus is ideal for use in the repair sector.

- **Clean working:** Thanks to the cartridge system, there is no longer a risk of splashing or leaking of the colour making it possible to even work cleanly on difficult to reach areas and overhead.
- **Flexible colour play:** The colour cartridges can be exchanged during one working cycle as often as desired. Thus, there are no limits of colour mixing for the user. The cartridges are available in a huge variety of colours.
- **Efficiently and economically:** Being reclosable, the colour cartridges make it possible to process small quantities. They can be stored and reused. Spot application and thin layers of paint ensure short drying periods.
- **Easy to clean:** A cleaning cartridge ensures cleaning in seconds.

Convince yourself of the uncomplicated handling of the device and of the many advantages it offers!
